\$4.95 PER GRAM

RRP / Pack Size	\$99 for 20g
Price / gram	\$4.95
Price / mg (@ 24% potency)	\$0.0206

PRODUCT INFORMATION

Coronel Buendía's Peppermint Kush is a high-potency indica-dominant cultivar bred from Stella Blue x Nepal Kush. It is grown under full-spectrum equatorial sunlight at high altitudes in Colombia, optimising the cannabinoid and terpene profile.

Patients report pronounced physical relaxation with strong sedative properties, making it particularly suitable for evening and sleep-focused applications. The initial onset delivers gradual somatic release followed by mild euphoria and mental quietude. At higher doses, this cultivar may produce pronounced couchlock and somnolence, useful in cases of pain-related sleep disruption.

FLAVOUR

Mint, menthol, black pepper, Woody, earthy,
Sharp menthol on inhale with a lingering spiced finish

INDICATIONS:

Insomnia

Chronic
Pain
